# TIMOREX ACT®

**ACTIVE INGREDIENT:**

| | |
|---|---|
| Tea Tree Oil | 12.5% |
| **OTHER INGREDIENTS:** | 87.5% |
| **TOTAL:** | **100.0%** |

This product contains 0.949 lb. tea tree oil per gallon

## KEEP OUT OF REACH OF CHILDREN

# CAUTION / PRECAUCIÓN

*Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.*
*(If you do not understand the label, find someone to explain it to you in detail.)*

| FIRST AID | |
|---|---|
| **If On Skin Or Clothing** | • Take off contaminated clothing.<br>• Rinse skin immediately with plenty of water for 15 – 20 minutes.<br>• Call a poison control center or doctor for treatment advice. |
| **If Inhaled** | • Move person to fresh air.<br>• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.<br>• Call a poison control center or doctor for treatment advice. |

## HOT LINE NUMBER

**Poison Control – National Capital Poison Center 24 hours, 365 days/year**
**1-800-222-1222**

**NOTE TO PHYSICIAN –** No special antidote. Treat symptomatically and supportively.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

See back panel for additional precautionary statements.

**EPA Reg. No.:** 86182-3-88783
**EPA Establishment No.:** 90464-ISR-001

**Manufactured for:**
Stockton (Israel) Ltd.

Summit Agro USA, LLC
240 Leigh Farm Road, Suite 415
Durham, NC 27707

stk bio-ag technologies

**Net Contents: 1 Gallon**

# PRECAUTIONARY STATEMENTS

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS – CAUTION:** Harmful if inhaled. Avoid breathing (dust, vapor, or spray mist). Remove and wash contaminated clothing before reuse. Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Wear protective clothing and gloves.

**PERSONAL PROTECTIVE EQUIPMENT (PPE)**

**Mixers and loaders must wear:**

- Long-sleeved shirt
- Long pants
- Socks with shoes
- Water proof gloves including barrier laminate, butyl rubber ≥14mils, nitrile rubber ≥14 mils, neoprene rubber ≥14 mils, natural rubber ≥14 mils, polyethylene, polyvinyl chloride ≥14 mils, and viton ≥14 mils
- Protective eyewear

**Applicators must wear:**

- Long-sleeved shirt
- Long pants
- Socks with shoes

Follow manufacturer's instructions for cleaning / maintaining PPE. If no such instructions for washables, use detergent and hot water. Keep and wash PPE separately from other laundry.

**USER SAFETY RECOMMENDATIONS:** Users should remove clothing immediately if pesticide gets inside. Then wash thoroughly and put on clean clothing. Users should remove PPE immediately after handling this product. Wash the outside of gloves before removing. As soon as possible, wash thoroughly and change into clean clothing.

**ENVIRONMENTAL HAZARDS:** This product is harmful to aquatic invertebrates. Drift and runoff may be hazardous to aquatic organisms in water adjacent to treated areas. For terrestrial uses: Do not apply directly to water, or to areas where surface water is present, or to intertidal areas below the mean highwater mark. Do not contaminate water when cleaning equipment or disposing of equipment wash waters.

**PHYSICAL AND CHEMICAL HAZARDS: Combustible.** Do not use or store near heat or open flame.

# DIRECTIONS FOR USE

It is a violation of Federal law to use this product in a manner inconsistent with its labeling. Do not apply this product in a way that will contact workers or other persons, either directly or through drift. Only protected handlers may be in the area during application. For any requirement specific to your State or Tribe, consult the State/Tribal agency responsible for pesticide regulation.

## AGRICULTURAL USE REQUIREMENTS

Use this product only in accordance with its labeling and with the Worker Protection Standard, 40 CFR Part 170. This standard contains requirements for the protection of agricultural workers on farms, forests, nurseries and greenhouses, and handlers of agricultural pesticides. It contains requirements for training, decontamination, notification, and emergency assistance. It also contains specific instructions and exceptions pertaining to the statements on this label about personal protective equipment (PPE), and restricted-entry interval. The requirements in this box only apply to uses of this product that are covered by the Worker Protection Standard.

Do not enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 4 hours.

PPE required for early entry to treated areas that is permitted under the Worker Protection Standard and that involves contact with anything that has been treated, such as plants, soil or water, is coveralls, waterproof gloves, shoes plus socks, and protective eyewear.

**PRODUCT INFORMATION:**

**Timorex Act** is a fungicide for the prevention and control of plant diseases on horticultural and agricultural crops. When conditions are conducive to heavy disease pressure, use **Timorex Act** in a rotational program with other registered fungicides. **Timorex Act** offers a valuable tool for management of resistance to chemical fungicides through its unique mode of action.

Use **Timorex Act** for Integrated Pest Management strategies. For resistance management, **Timorex Act** contains a Group 46 fungicide. Appropriate resistance management strategies should be followed. To delay fungicide/bactericide resistance, rotate the use of **Timorex Act** fungicides within a growing season sequence, or among growing seasons, with different groups that control the same pathogens, use tank mixtures with fungicides from a different group that are equally effective on the target pest when such use is permitted, adopt an integrated disease management (IPM) program for fungicide use, and contact your local extension specialist or certified crop advisor for any additional pesticide resistance management and/or IPM recommendations for specific crops and pathogens.

**PREHARVEST INTERVAL: Do not apply Timorex Act within 48 hours of harvest.**

**AGRICULTURAL CROPS**

**Timorex Act** is for the prevention and control of plant diseases on horticultural and agricultural crops. Use **Timorex Act** to prevent and control diseases including Powdery mildew, Downy mildew, Early and late blight, Sour rot, Rice grain complex, Brown leaf spot, Black sigatoka, and diseases caused by *Sclerotinia, Botrytis, Fusarium, Rhizoctonia, Cladosporium, Colletotrichum, Cercospora* and several bacterial species.

**USE PRECAUTIONS AND RESTRICTIONS:**

The maximum seasonal use rate is 0.89 lb. ai/acre per season (120 fl. oz. **Timorex Act**/acre/season). The maximum application rate is 0.259 lb. ai/acre/application (35 fl. oz. **Timorex Act**/acre/application).

**MIXING DIRECTIONS:**

SHAKE WELL BEFORE USE. Fill tank with half the water, then add **Timorex Act** and agitate. Add remaining water. When entire volume of water has been added, thoroughly agitate mix before making application. Use solution within 24 hours. It is possible to mix **Timorex Act** with other pesticides. Consult specific product labels for additional information or restrictions concerning tank mixing. Observe the most restrictive of the labeling limitations and precautions of all products used in mixtures.

**APPLICATION DIRECTIONS:**

## GROUND APPLICATION:

Do not spray in temperatures above 95ºF (35ºC). Do not apply more than 0.89 lb. ai/acre per season (120 fl. oz. **Timorex Act**/acre/season).

Make applications in the early stages of plant growth when conditions favor disease. Early treatment prevents diseases from developing. When using **Timorex Act** in a spray program, do not apply **Timorex Act** within 7 days of sulfur, captan or chlorothalonil products.

Apply **Timorex Act** in the greenhouse, nursery or field using conventional equipment as a spray, or drench to the point of saturation. Good coverage and wetting of the foliage is required. Use enough spray solution to completely penetrate the leaf canopy and both cover the top and underside of all leaves until runoff. The amount of spray solution to apply will vary depending on the type of crop. Most crops will require up to 100 gallons of spray per acre. Use no less than 20 gallons per acre carrier, unless specified in detailed use instructions in the Crop Table. If using more than 500 gallons per acre carrier, use higher labeled rates of **Timorex Act**. Prepare enough solution based on plant density and soil conditions to ensure thorough coverage. Reapply at 7-30 day intervals or as needed throughout the growing season for preventative control up until 48 hours of harvest.

**Timorex Act** can be applied using the following equipment: tractor-mounted boom, airblast, high clearance, hose-end, backpack*, and other pressurized sprayers*; or hand-held sprayers*; water wheel and other drench applicators; and shank or other soil injection method. Thorough coverage of all foliage is essential for effective disease control or suppression. To achieve good coverage, use proper spray pressure, gallons per acre, nozzles, nozzle spacing and ground speed. Consult spray nozzle and accessory catalogues for specific information on proper equipment calibration.

*Not for use in California.

## DRENCH APPLICATION:

Mix 1 - 2 fluid ounces of **Timorex Act** per 10 gallons of water and apply as a drench or coarse spray to soil or other growing media in pots, flats, plugs, trays, or planting beds, for control or suppression of soil borne diseases of seedlings, cuttings, bedding plants, and transplants (including vegetables and other transplanted food crops). Make first application at or immediately before seeding, sticking, germination, or transplanting. Repeat applications every 7-14 days as needed.

Do not apply this product through any type of irrigation system.

## COMPATIBILITY:

Consult specific product labels for additional information or restrictions concerning tank mixing. Observe the most restrictive of the labeling limitations and precautions of all products used in mixtures. It is always advisable to conduct a spray compatibility test when you plan to mix this product with other products. To determine the physical compatibility of this product with other products, use a jar test. Using a quart jar, add the proportionate amounts of the products to approximately one quart of water with agitation. Add dry formulations first, then flowables, and then emulsifiable concentrates last. After thorough mixing, allow this mixture to stand for 5 minutes. If the combination remains mixed or can be readily remixed, it is physically compatible. Once compatibility has been proven, use the same procedure for adding products to the spray tank. Use tank-mix combinations on a small number of plants before treating large areas, as crop sensitivity to these mixtures may vary.

**Timorex Act** has been evaluated for phytotoxicity on a variety of crops under various normal growing conditions. However, testing all crop varieties, in all mixtures and combinations is not feasible. Prior to treating entire crop, test a small portion of the crop for sensitivity.

Use **Timorex Act** on the foliage and fruit of the following agricultural commodities and horticultural crops:

**Open Field Crops**

| Crop | Target Diseases | Fl. Oz. Product/Acre (lbs. ai/acre) | Remarks |

# STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

**Pesticide Storage:** Store in original container, in a dry, cool place out of direct sunlight and away from heat sources. Keep from overheating or freezing.

**Pesticide Disposal:** Wastes resulting from this product may be disposed of on site or at an approved waste disposal facility.

**Container Handling:**

*(For containers ≤ 5 gallons)*

Non-refillable container. Do not reuse or refill this container. Triple rinse (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration. Do not burn, unless allowed by State and local ordinances.

*(For containers ≥ 30 gallons)*

Non-refillable container. Do not reuse or refill this container. Triple rinse (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Then offer for recycling or reconditioning, or puncture and dispose of in sanitary landfill, or incineration. Do not burn, unless allowed by State and local ordinances.

## WARRANTY STATEMENT

To the extent consistent with the law, seller makes no warranty express or implied, of merchantability, fitness or otherwise concerning the use of this product other than as indicated on the label. To the extent consistent with the law, user assumes all risks of use, storage or handling not in strict accordance with label instructions.

# TIMOREX ACT®

**ACTIVE INGREDIENT:**
Tea Tree Oil..... 12.5%
**OTHER INGREDIENTS:**..... 87.5%
**TOTAL:**.....**100.0%**
This product contains 0.949 lb. tea tree oil per gallon

## KEEP OUT OF REACH OF CHILDREN

## CAUTION / PRECAUCIÓN

*Si usted no entiende la etiqueta, busque a alguien para que se la explique a usted en detalle.*
*(If you do not understand the label, find someone to explain it to you in detail.)*

## FIRST AID

| | |
|---|---|
| **If On Skin Or Clothing** | • Take off contaminated clothing.<br>• Rinse skin immediately with plenty of water for 15 – 20 minutes.<br>• Call a poison control center or doctor for treatment advice. |
| **If Inhaled** | • Move person to fresh air.<br>• If person is not breathing, call 911 or an ambulance, then give artificial respiration, preferably by mouth-to-mouth, if possible.<br>• Call a poison control center or doctor for treatment advice. |

## HOT LINE NUMBER

**Poison Control – National Capital Poison Center 24 hours, 365 days/year**
**1-800-222-1222**

**NOTE TO PHYSICIAN –** No special antidote. Treat symptomatically and supportively.

Have the product container or label with you when calling a poison control center or doctor, or going for treatment.

See back panel for additional precautionary statements.

## PRECAUTIONARY STATEMENTS

**HAZARDS TO HUMANS AND DOMESTIC ANIMALS – CAUTION:** Harmful if inhaled. Avoid breathing (dust, vapor, or spray mist). Remove and wash contaminated clothing before reuse. Avoid contact with skin or clothing. Wash thoroughly with soap and water after handling and before eating, drinking, chewing gum, using tobacco, or using the toilet. Wear protective clothing and gloves.

## STORAGE AND DISPOSAL

Do not contaminate water, food or feed by storage or disposal.

**Pesticide Storage:** Store in original container, in a dry, cool place out of direct sunlight and away from heat sources. Keep from overheating or freezing. **Pesticide Disposal:** Wastes resulting from this product may be disposed of on site or at an approved waste disposal facility. **Container Handling:** *(For containers ≤ 5 gallons)* Non-refillable container. Do not reuse or refill this container. Triple rinse (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank and drain for 10 seconds after the flow begins to drip. Fill the container ¼ full with water and recap. Shake for 10 seconds. Pour rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Drain for 10 seconds after the flow begins to drip. Repeat this procedure two more times. Then offer for recycling if available or puncture and dispose of in a sanitary landfill, or by incineration. Do not burn, unless allowed by State and local ordinances. *(For containers ≥ 30 gallons)* Non-refillable container. Do not reuse or refill this container. Triple rinse (or equivalent) promptly after emptying. Triple rinse as follows: Empty the remaining contents into application equipment or a mix tank. Fill the container ¼ full with water. Replace and tighten closures. Tip container on its side and roll it back and forth, ensuring at least one complete revolution, for 30 seconds. Stand the container on its end and tip it back and forth several times. Turn the container over onto its other end and tip it back and forth several times. Empty the rinsate into application equipment or a mix tank or store rinsate for later use or disposal. Repeat this procedure two more times. Then offer for recycling or reconditioning, or puncture and dispose of in sanitary landfill, or incineration. Do not burn, unless allowed by State and local ordinances.
